### Good to know

- **Log-rolls available in 33m, 66m, 132m**
- Spools available in various widths and lengths
- Paper and film liner available
- Additional thicknesses possible on request
- PV29 liner is the best film liner in the market according to several customers (OEM / OES / Converter)
- New Liner Systems for ACX<sup>plus</sup> Primerless line (no silicone on the outside) coming in 2023

Competition

Lower compression during mounting enables for **smaller design** gaps. Thinner open tape area together with **deep black color** results in almost **invisible bond**.

### Our Power Offer: 77311 has high bonding strength on various Clear Coats used in main OEM plants

- Wide Clear Coats Adaptability → The same tape solution for different plants using different CCs
- High economical efficiency → The same tape solution for different APM projects

90° Peel Adhesion of 77311  
acc. to Geely Spec

Temperature resistance  
long term - 40°C to +90°C

### Excellent performance within the first minute to LSE plastic

No matter whether it is a low temperature down to 5°C or high temperature up to 40°C, within the first minute after application our primerless products reach a near-ultimate peel adhesion level on most substrates, whereas the typical solutions on the market need time to set.
